ABOUT ME

Associate Full Stack Engineer with hands-on experience in designing, developing, deploying, and maintaining scalable web applications using React.js, Next.js, Node.js, Express.js, JavaScript, and TypeScript. Experienced in RESTful API development, MongoDB, PostgreSQL, AWS cloud services, Docker, CI/CD pipelines, Agile/Scrum methodologies, debugging, testing, and cross-functional collaboration with QA engineers and designers. Passionate about building high-quality user-focused digital solutions and continuously learning modern web technologies.

SKILLS

Technical Expertise

NextJS | Python | Java | JavaScript | TypeScript | React.js | React Native | Node.js | C# | SQL | FastAPI | Spring Boot | Express.js | Tailwind CSS | Modern Web Application Architecture | PostgreSQL | MongoDB | HTML5 | Software Development Lifecycle (SDLC) | CSS3 | GitHub | Application Monitoring | User Interface Development (UI) | Responsive Web Design

Cloud, DevOps & Infrastructure

AWS | Nginx | Docker | Linux | Jenkins | CI/CD | GitHub Actions | GitLab | Agile | Scrum | Code Reviews | Debugging | Testing

AI, ML & Soft Skills

OpenAI APIs | LangChain | Semantic Search | Prompt Engineering | AI Agents / Multi-Agent Systems | LangGraph | AI Workflow Automation | FastAPI AI Services | Vector DB | Retrieval-Augmented Generation (RAG) | Large Language Models (LLM) | Microservices | Data Structures & Algorithms | API Integration | Backend Development | Team Collaboration | RESTful API Development | Communication

WORK EXPERIENCE

ASSOCIATE SOFTWARE ENGINEER – AVANKA IT (PVT) LTD – 08/03/2026 – Current – SRI LANKA

- Developing and maintaining scalable web and cross-platform applications using React.js, React Native, Node.js, and FastAPI... contributing to scalable full-stack solutions and production-ready feature delivery.
- Built a local LLM-powered document processing system with semantic search capabilities for efficient querying and retrieval of legal documents.
- Designed scalable RESTful APIs, participated in code reviews, and collaborated with QA engineers to troubleshoot, debug, and resolve application issues while improving system reliability and performance.

SOFTWARE ENGINEER INTERN – AVANKA IT (PVT) LTD – 07/09/2025 – 07/03/2026 – SRI LANKA

- Contributed to the enhancement of a web-based meeting platform using React and Node.js by implementing new features, optimizing application performance, and improving overall user experience.
- Developed scalable backend and full-stack solutions, including a centralized file repository system integrated with SQL databases and AS400, and a FastAPI-based real-time language translation service exposed through RESTful APIs.
- Worked within Agile/Scrum teams, participating in sprint planning, daily stand-ups, retrospectives, and collaborative development activities.

EDUCATION AND TRAINING

01/08/2022 – 01/03/2026 Sri Lanka

BSC (HONS) ELECTRONICS AND COMPUTER SCIENCE (GPA- 3.66) University of Kelaniya

● PROJECTS

AI Text-to-Speech SaaS Platform (ElevenLabs Clone)

- Developed a full-stack AI-powered text-to-speech SaaS application with secure user authentication, voice generation capabilities, and subscription-based access control.
- Integrated Stripe payment processing for subscription management and implemented scalable backend services for user and content management.
- Tech Stack: Next.js, React, TypeScript, Tailwind CSS, ShadCN UI, Clerk, ElevenLabs API, Prisma, MongoDB, Stripe, Appwrite, REST APIs.

Link <https://github.com/Janadajayathilaka/Text-to-speech-nextjs>

E-commerce (MERN Stack) Project

- Developed and deployed a scalable MERN-based e-commerce platform featuring JWT authentication, product and order management dashboards, Stripe payment integration, and AWS S3 image storage.
- Designed and implemented a CI/CD pipeline using GitHub Actions, containerized the application with Docker, and deployed the system on AWS to ensure reliable and automated delivery.
- Tech Stack: React.js, Node.js, Express.js, MongoDB, AWS, Docker, CI/CD, GitHub Actions, Nginx, JWT

Link <https://github.com/Janadajayathilaka/E-Commerce-Watch-shop>

AI Fitness Recommendation System (Microservices Blueprint)

- Designed and implemented microservices APIs, including activity ingestion integrated with RabbitMQ, and AI-based recommendation retrieval to deliver personalized fitness insights.
- Tech Stack: Java, Spring Boot Microservices, Spring Cloud (Eureka, Gateway), React.js, Keycloak Authentication (OAuth2), RabbitMQ (Event-Driven Architecture), PostgreSQL, MongoDB, REST APIs, AI-powered Recommendation System (LLM), Zustand

Link <https://github.com/Janadajayathilaka/Fitness-Recommendation-Microservices>

CI/CD Pipeline for Spring Boot Application

- Built and containerized a Spring Boot application with a complete CI/CD pipeline using GitLab, Jenkins, and Docker to automate integration and deployment workflows.
- Deployed the application on AWS with Nginx as a reverse proxy, integrated SonarQube for code quality analysis, and secured the system using SSL certificates with Certbot.
- Tech Stack: Spring Boot, Java, GitLab CI/CD, Docker, Jenkins, Nginx, SonarQube, Certbot, MySQL, AWS

Link <https://github.com/Janadajayathilaka/Springboot-CI-CD>

AI Travel Agent Workflow (Backend Multi-Agent System)

- Developed a backend multi-agent travel planning system using LangChain and LangGraph, implementing specialized agents for booking, flight search, and itinerary planning
- Designed agent workflows to coordinate between booker, flight, and planner agents for efficient task execution and response generation
- Tech Stack: Python, LangChain, LangGraph, LLMs

● CERTIFICATIONS

Amazon Web Services

AWS - (Educate Cloud 101, Cloud practitioner, Cloud Computing Essentials)

Udemy

Udemy - (Mastering Linux, A-Z 900: Azure Fundamentals Complete Training)

KodeCloud

KodeCloud - (n8n:Zero to Hero, RAG crash course, AWS for Beginners, AWS 100 days of Cloud)

CoDeKu

CoDeKu - (Kubernetes from 1000 feet, Cloud Computing for Absolute Beginners)
