Portfolio: personal_portfolio

Personal Profile

Associate Software Engineer with hands-on experience in full-stack development, backend systems, and AI-driven applications. Proficient in building scalable and efficient solutions using Node.js, FastAPI (Python), and React, with practical experience in database design, cloud deployment, and CI/CD pipelines. Demonstrated ability to develop RESTful APIs and multi-agent AI systems using modern frameworks such as LangChain and LangGraph. Passionate about delivering production-ready software and continuously learning emerging technologies in software engineering and Generative AI.

Experience

Associate Software Engineer – Avanka IT (Pvt) Ltd **Feb 2026 – Present**

- Currently developing a cross-platform mobile application using React Native with a Node.js backend to support sales operations and improve business workflow efficiency
- Currently developing a local LLM-based document processing system for a law firm, enabling efficient querying of internal legal documents
- Contributing to backend and full-stack development using Node.js, FastAPI (Python), and React.js

Software Engineer Intern – Avanka IT (Pvt) Ltd **Sep 2025 – Feb 2026**

- Enhanced an existing online meeting platform using React and Node.js by implementing new features and improving system performance and user experience
- Designed and developed a centralized file repository system using React and Node.js, integrating SQL databases and AS400 for secure and scalable file storage and management
- Built a language translation backend using FastAPI (Python) and Hugging Face datasets, enabling real-time translation via RESTful APIs

Education

University of Kelaniya, Sri Lanka **Aug 2022 – Feb 2026**

- Bsc (Hons) Electronics and Computer Science (CGPA: 3.66)
- Relevant Coursework: Data Structures & Algorithms, OOP, Databases, Machine Learning

Taxila Central College, Horana

- G.C.E Advanced Level – Physical Science (Combined Mathematics -A, Chemistry – B, Physics- B, Z-score: 1.6)

Projects

AI Travel Agent Workflow (Backend Multi-Agent System) – (GitHub)

- Developed a backend multi-agent travel planning system using LangChain and LangGraph, implementing specialized agents for booking, flight search, and itinerary planning
- Designed agent workflows to coordinate between booker, flight, and planner agents for efficient task execution and response generation
- Tech Stack: Python, LangChain, LangGraph, LLMs

CI/CD Pipeline for Spring Boot Application –(GitHub)

- Built a Spring Boot application integrated with a complete CI/CD pipeline using GitLab, automating build, test, and deployment processes
- Containerized the application using Docker and configured Jenkins for continuous integration and deployment workflows

- Deployed the application on AWS with Nginx as a reverse proxy, integrated SonarQube for code quality analysis, and secured the system using Certbot (SSL)
- Tech Stack: Spring Boot, Java, GitLab CI/CD, Docker, Jenkins, Nginx, SonarQube, Certbot, MySQL, AWS

E-commerce (MERN Stack) Project – (GitHub)

- Built a responsive e-commerce web application using the MERN stack (MongoDB, Express Js, React Js, Node Js)
- Implemented JWT-based authentication and developed an admin dashboard for managing products and orders, Images stored in AWS S3, and integrated the Stripe Payment Gateway.
- Deployed the application on AWS for scalable and reliable performance.
- Tech Stack: React.js, Node.js, Express.js, MongoDB, AWS

Spotify Clone(Backend Git Repository , Frontend Git Repository)

- Built a feature-rich music streaming platform with real-time playlist updates, user-artist interactions, and seamless audio playback.
- Implemented core functionalities such as secure login with JWT, song/artist search, song releases, and payment integration for premium access.
- Tech Stack: Spring Boot, React.js, CSS, MongoDB, JWT, Cloudinary

Skills

- Languages: Python, JavaScript/ TypeScript, Java, SQL
- Frameworks & Libraries: Node.js, React.js, React Native, FastAPI, Spring Boot, Express.js, Tailwind CSS, ShadCn /UI
- Databases: MySQL, MongoDB
- Cloud & DevOps: AWS, Docker, Jenkins, Nginx, Git, GitLab, Linux
- AI & GenAI: Large Language Models (LLMs), LangChain, LangGraph, Retrieval Augmented Generation (RAG)
- Tools: Postman, VS Code, IntelliJ IDEA, Android Studio
- Soft Skills: Problem Solving, Critical Thinking, Teamwork, Communication, Continuous Learning

Leadership Experience and Volunteering

- **Electronics Student's Society – UOK** University of Kelaniya, Sri Lanka
  Junior Treasurer - Aug 2023 – Jul 2024
- **Electronics and Computer Science Club -UOK** University of Kelaniya, Sri Lanka
  Finance Lead - Jan 2023 – Sep 2023
- **UWU Robotic Death Race** University of Uva Wellassa, Sri Lanka
  Oct 2024
